

Aariyan Apu

Full Stack Developer — Next.js · React · TypeScript · Node.js

Full Stack Developer with 6+ years of experience delivering production web and mobile applications with Next.js, React, TypeScript, and Node.js. Proven record of leading frontend teams, shipping e-commerce and SaaS platforms end to end, and driving measurable results — 99.9% uptime, 20% faster team delivery, and Core Web Vitals-optimized storefronts. Strong in REST API design, PostgreSQL, MongoDB, CI/CD, Docker, and Linux server administration.

Experience

Frontend Engineer · [Lovely IELTS](#)

Feb 2026 — Present

- Building the frontend of an AI-powered IELTS platform for Bangladeshi students — line-by-line writing feedback with band scores, explained in Bengali.
- Shipping the Writing Task 1/2 checker UI and a timed real-exam mock test simulation; 2,000+ submissions checked by 500+ students.

Fullstack Engineer · [First Aid Surgical](#)

Aug 2025 — Jan 2026

- Directed the frontend build of a multi-language e-commerce platform for medical equipment with i18n, a B2B quote request system, SEO, and Core Web Vitals optimization.

Frontend Lead · [NonstopGG](#)

Jan 2025 — May 2025

- Led frontend development of a B2B digital gift card marketplace in Next.js with 500+ products: product catalog UI, secure checkout flows, and a real-time inventory dashboard.
- Automated delivery cut fulfillment from hours to seconds with zero manual intervention.

Senior Front-End Engineer · [Ahar Tech](#)

Jul 2024 — Feb 2025

- Spearheaded development of Bangladesh's first meal subscription platform; resolved 90% of critical bugs within 48 hours while maintaining 99.9% uptime.
- Mentored junior developers, improving team delivery speed by 20%.

Assistant Software Engineer · [TPDO](#)

Jun 2019 — Mar 2023

- Overhauled IT infrastructure, reducing downtime by 50%; built a custom CRM in React that helped increase donations by 25%.
- Managed IT policies, procedures, and organization-wide digital platforms.

Selected Projects

Daily Bangladesh Time · [en.dailybangladeshtime.com](#)

English-language news portal serving thousands of daily readers — SSR for SEO, real-time push notifications, PWA, role-based editorial workflow. Next.js, Drizzle, PostgreSQL.

GBDC · [gbdcbd.org](#)

Community platform connecting blood donors with recipients across Bangladesh — real-time notifications, live chat, donor profiles; 3,000+ active users. Next.js, PostgreSQL.

Mellow Bangla · [mellowbangla.com](#)

Native Android radio app for Bangla music and talk stations — background playback, song requests, real-time feedback, Google login. React Native, NestJS, Next.js.
